

James Scott

Product Designer

I'm a UX designer with a focus on turning complex ideas into simple, intuitive experiences. Working across the full design process. From research and ideation to wire framing, prototyping, and testing; while keeping user needs at the center.

Qualifications & Experience

jamesescott.design@gmail.com
07718076379

6 Years Experience (& Counting)

Qualifications

Level 2 Interactive Media • Pass
NRC 2015 - 2016

Level 3 Interactive Media • Distinction
NRC 2016 - 2018

BDes Hons Interaction Design • 1st
Ulster University 2018 - 2022

Experience

The Foundation • 2020 - 2022

I joined the Foundation in 2020 as a placement student and transitioned to a part-time designer role afterward. This experience significantly enhanced my design skills and industry knowledge. During my time at the Foundation, I have contributed to various projects, including branding, motion graphics, UI design, and UX research and testing.

Instil Software • 2022 - Present

After graduating from university, I started working at Instil Software. The role let me focus on UI and UX, giving me hands-on experience designing intuitive, user-friendly interfaces while growing my skills .

I have also been involved in the marketing department, utilising my skills in motion graphics, branding and graphic design.

Full project case studies and detailed walkthroughs can be presented in person upon request.

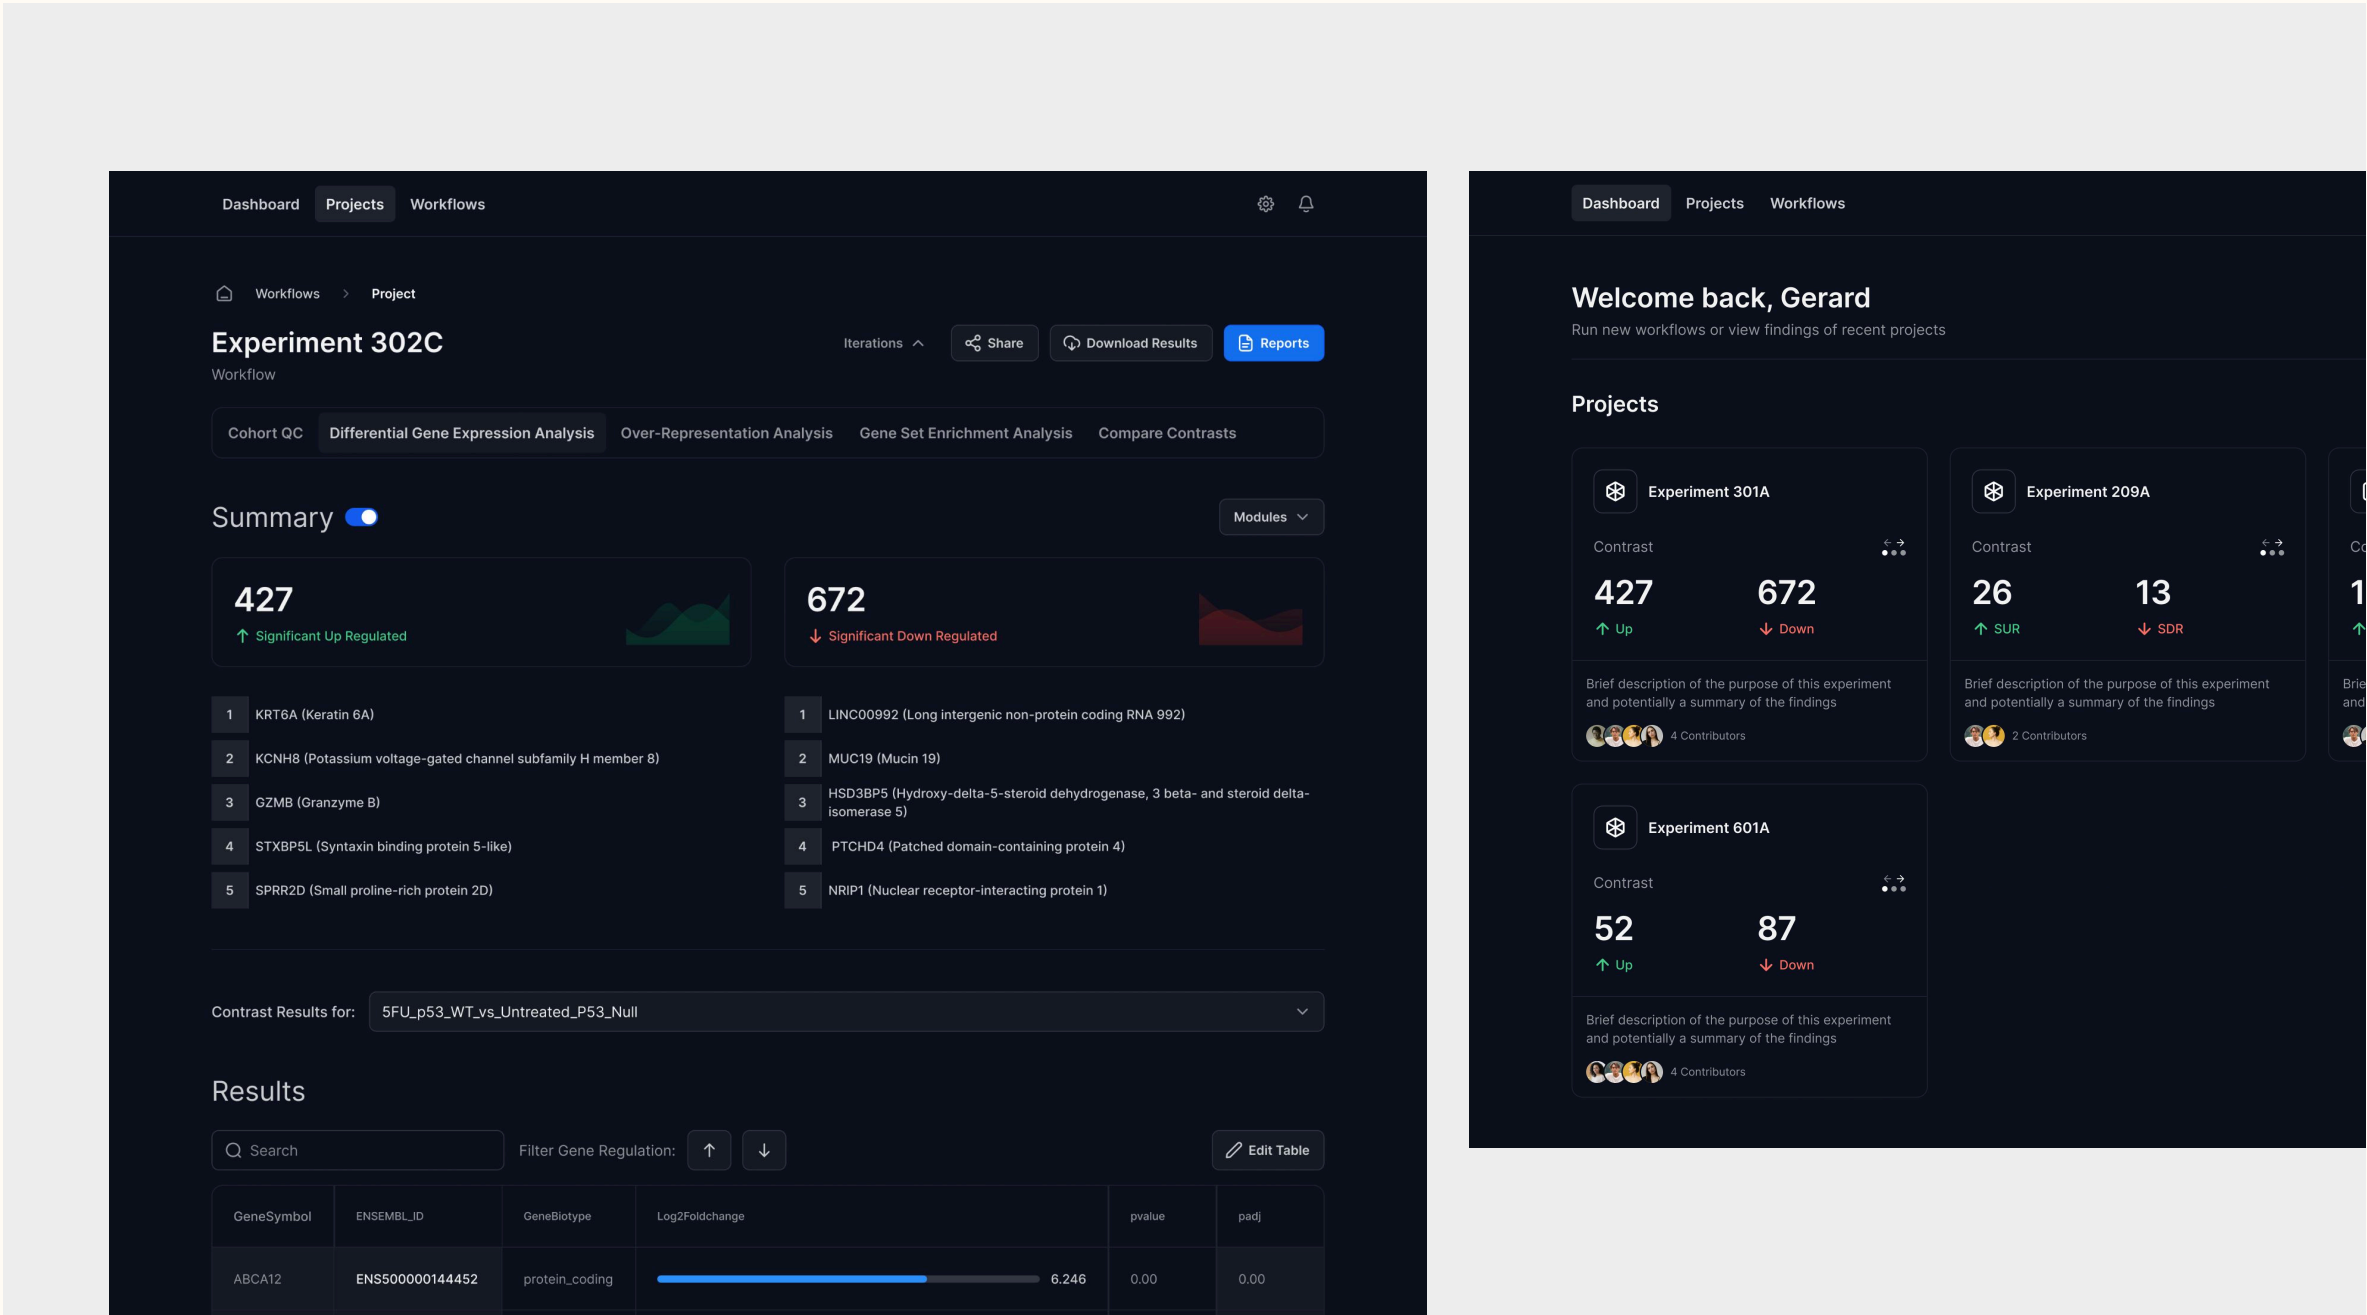

Premier Electricity Group

2025 • Web Design

As the Web Designer for Premier Electricity Group, I created a modern business website for their solar panel installation services. The site was designed to showcase their offerings, build customer trust, and generate leads through a clean, user-friendly experience.

Genome Sequencing SaaS

2024 • SaaS Design

Designed a modern user interface for a gene sequencing software platform, improving usability and making complex workflows more intuitive for specialist users. Through stakeholder workshops and collaborative discovery sessions, I gathered requirements, identified opportunities for new features, and developed a polished proof of concept that helped communicate the product vision and support future growth.

Legal Dashboard Design

2025 - Present • Platform Design

Acted as the lead designer on an ongoing legal software product, improving usability and efficiency through a modernised user interface. Took features from concept to delivery, enhancing the core dashboard and introducing AI-powered features that streamlined workflows and improved the overall user experience.

EMS IOS App Redesign

2026 • IOS App Design

Redesigned an existing EMS web application into an iPad app for use by paramedics, aligning the interface with Apple Human Interface Guidelines. Refined user flows and UX patterns to ensure a seamless, native-feeling mobile experience in time-critical environments, improving usability, consistency, and accessibility across core journeys.

Healthcare Dashboard Design

2024-2025 • Platform Design

Designed a healthcare platform dashboard focused on intuitive, user-centred experiences supporting key business and operational needs. Defined UX strategy and delivered core product features from concept through to delivery, ensuring scalable and efficient solutions. Worked closely with stakeholders through workshops and meetings to present solutions, incorporate feedback, and maintain strong alignment throughout the project.
